NOVA LS

WORK WITH STYLE

NOVA LS *sneaker offers the concept of comfort due to the organic design principles that allow for a perfect balance between stability, rigidity and adaptability to different contexts to a functional, but contemporary look.*

Description

NOVA LS is a modern and versatile sneaker that perfectly blends comfort and style. The platform in it's sole is designed to better help distribute body weight, promoting a more natural posture and reducing the impact on tendons and joints.

Users

NOVA LS is ideal for professionals who spend long hours on their feet and tend to experience fatigue or discomfort, as well as active women who value both comfort and style:

- **Hospitals and Other Healthcare Institutions**
- **Restaurants and Hospitality sector**
- **Beauty & Cosmetic Institutes**
- **Everyone with an active life**

Specifications

Super Light
WOCK created technology to produce remarkably light, resistant and comfortable footwear.

Shock Absorption
The special design helps to reduce the occurrence of micro–lesions in tendons, bones and joints, and the feeling of tired legs.

Superior Grip
The rubber tread on the sole is designed to enhance the grip on any surface.

Optimised upper
Perfectly balanced for every season and ocasion with a layered temperature neutralization system that regulate temperature.

Natural Fitting
Designed to accommodate all foot types, providing comfort and stability.

Removable Insole
It's detachable to allow a deeper cleaning.

Water Repellent
Water-repellent finish on the material prevents liquid penetration.

Materials and Technologies

The **PROCOMFORT**™ Technology, with a unique combination of design and materials, makes walking and standing feel natural again, with a perfect balance between adaptability and rigidity to provide stability and comfort along the journey.

The **HEEL LIFT™** Technology features a raised sole designed to better help distribute body weight, promoting a more natural posture and reducing the impact on tendons and joints. This technology provides prolonged comfort, improved stability, and reduced fatigue throughout the day—ideal for professionals who spend long hours on their feet.

Technical Standard

CE
Regulation (EU) 2016/425.

Care and Cleaning

For proper shoe care, gently remove dirt with a soft brush. Clean other stains using a sponge or a damp cloth in a mixture of water and a few drops of laundry detergent or mild soap, then rinse with water. Let the shoes dry in the shade, in a ventilated area, away from heat sources, and remove the insoles to allow them to air out. Do not machine wash.

Attention

To keep your shoes new and beautiful for much longer, it is essential to follow some recommendations: Avoid getting your shoes wet, but in case this occurs, never place them in the sun.
Let them dry in the shade and also away from any other source of heat, because heat damages the materials, the colour and the texture.
A soft cloth is the main ally of this type of shoe and its cleaning should be done weekly or whenever necessary.
