EASYLITE

STEP IN
MOVE ON

EASYLITE *offers a new concept in professional footwear with the fully integrated Pop System™, combining innovation and modernity. With a bold design and advanced technical functionality, it is a unique solution that merges lightness, comfort, practicality, hygiene, and safety.*

Description

EASYLITE is a technically complete and certified professional shoe, designed to provide maximum comfort and confidence to the user. Its innovative and disruptive design balances aesthetics and functionality, resulting in a cutting-edge and visually distinctive shoe.

Users

EASYLITE was developed for demanding professionals who strive to perform at the highest level and need footwear that meets the energetic and movement demands of their daily routines:

- **Hospitals and Other Healthcare Institutions**
- **Restaurants and Hospitality sector**
- **Geriatric Institutions**
- **Services and Assistance**

Specifications

Super Light
WOCK created technology to produce remarkably light, resistant and comfortable footwear.

Antistatic
Promotes the dissipation of accumulated static electricity.

Shock Absorption
The special design helps to reduce the occurrence of micro–lesions in tendons, bones and joints, and the feeling of tired legs.

Natural Fitting
Designed to accommodate all foot types, providing comfort and stability.

Removable Insole
It's detachable to allow a deeper cleaning.

Upper Liquid Protection
Avoids the entrance of liquids inside the shoe.

Closed Heel
Additional support for the moments that require extra agility.

Breathable
The highly breathable knit promotes airflow and conforms anatomically to the shape of the foot.

SRC Level Antislip
The sole is designed to reduce the risk of slipping.

Washable
The footwear can be machine washed up to 30°C without the insole.

Unisex
Functional design developed to ergonomically adapt to the morphology of both male and female users.

Materials and Technologies

POP SYSTEM™ technology is an integrated slip-in hands-free system that allows you to put on and take off the shoes without using your hands. This system also features the HEEL STEP as a support to easily take them off hands-free.

EASYLITE is manufactured with **FEELITE™** technology, whose ultra-light material provides high comfort.

EVERGRIP™ technology, whose geometric design and the exclusive rubber compound used in the Evergrip™ outsole provide excellent grip on the ground, reducing the risk of slipping. This sole has a high slip-resistance rating – SR level.

EASYLITE is developed with **AIRGROOVE™** technology, featuring inner channels specifically designed to work with side openings to promote air circulation inside the shoe, balancing temperature and humidity.

EASYLITE comes equipped with the **PURE COMFORT™** Insole, a removable insole made from high-comfort Recycled Polyurethane foam with a polyester lining.

Care and Cleaning

Wash: Can be washed at up to 30ºC without the insole. Remove larger particles of dirt with a soft-bristled brush or cloth with water and detergent. The insole should be washed by hand.

Dry: Wipe with a cloth or dry at room temperature.

Attention

To preserve the appearance and performance of the footwear for much longer, it is essential to follow some recommendations: Never place it under direct sunlight and always let it dry in the shade, away from any other source of heat, as heat damages the materials, color, and texture. A soft cloth is the main ally for this type of footwear, and cleaning should be carried out weekly or whenever necessary.
